Trailer Jetters

7065-SC

The Supreme Culvert Machine

The O'Brien 7065-SC is a convenient trailer-size unit, capable of tackling the toughest culvert and larger sewer line jobs. The 7065-SC is towable full of water at highway speeds creating less downtime at the jobsite.

Standard Components

- 65 GPM @ 2000 psi water pump
- 110 hp water-cooled diesel engine
- Hydraulic driven, 190° rotating hose reel
- 500' x 1" hose capacity
- 700 gallon capacity polyethylene water tanks
- 6" steel channel frame
- 500 lb. capacity fenders with anti-skid treatment
- 12,000 lb. GVWR trailer
- Variable electronic throttle
- Murphy safety gauges with auto-shutdown
- Electric brakes
- 2" PVC fill pipe assembly
- Two (2) 12 volt power supply outlets

704030-SC

The Ultimate Work-Horse

The O'Brien 704030-SC is specially designed to provide maximum flow at maximum pressure. This versatile machine provides the best cleaning effectiveness combining high flow and high pressure.

Standard Components

- 40 GPM @ 3000 psi water pump
- 85 hp water-cooled diesel engine
- Hydraulic driven, 190° rotating hose reel
- 750' x 3/4" hose capacity
- 700 gallon capacity polyethylene water tanks
- 6" steel channel frame
- 500 lb. capacity fenders with anti-skid treatment
- 12,000 lb. GVWR trailer
- Variable electronic throttle
- Murphy safety gauges with auto-shutdown
- Electric brakes
- 2" PVC fill pipe assembly
- Two (2) 12 volt power supply outlets

7040-SC

Professional Look, Professional Performance

The O'Brien 7040-SC is specifically designed for the professional day-to-day sewer line cleaning. Municipalities and pumper/cleaner contractors rely on the power and versatility of the 7040-SC for cleaning a wide range of pipe sizes.

Standard Components

- 40 GPM @ 2000 psi water pump
- 65 hp water-cooled diesel engine
- Hydraulic driven, 190° rotating hose reel
- 750' x 3/4" hose capacity
- 700 gallon capacity polyethylene water tanks
- 6" steel channel frame
- 500 lb. capacity fenders with anti-skid treatment
- 12,000 lb. GVWR trailer
- Variable electronic throttle
- Murphy safety gauges with auto-shutdown
- Electric brakes
- 2" PVC fill pipe assembly
- Two (2) 12 volt power supply outlets

7030-SC

High Efficiency

The O'Brien 7030-SC allows users to consume less water, providing longer jetting time on a single tank of water. Municipalities and contractors who have less than convenient access to a constant water supply rely on the lower water consumption capability of the 7030-SC. This machine still packs a punch while utilizing less flow.

Standard Components

- 30 GPM @ 3000 psi water pump
- 65 hp water-cooled diesel engine
- Hydraulic driven, 190° rotating hose reel
- 750' x 3/4" hose capacity
- 700 gallon capacity polyethylene water tanks
- 6" steel channel frame
- 500 lb. capacity fenders with anti-skid treatment
- 12,000 lb. GVWR trailer
- Variable electronic throttle
- Murphy safety gauges with auto-shutdown
- Electric brakes
- 2" PVC fill pipe assembly
- Two (2) 12 volt power supply outlets

Trailer Jetters

3518-SC

Standard Components

- 18 GPM @ 4000 psi water pump
- 65 hp water-cooled diesel engine
- Hydraulic driven, 190° rotating hose reel
- 1000' x 1/2" hose capacity
- 350 gallon capacity polyethylene water tank
- 6" steel channel frame
- 500 lb. capacity fenders with anti-skid treatment
- 7,000 lb. GVWR trailer
- Variable electronic throttle
- Murphy safety gauges with auto-shutdown
- Electric brakes
- 2" PVC fill pipe assembly
- Two (2) 12 volt power supply outlets

3515-CF

Standard Components

- 15 GPM @ 3000 psi water pump
- 37 hp water-cooled diesel engine
- Hydraulic driven hose reel
- 600' x 1/2" hose capacity
- 350 gallon capacity polyethylene water tank
- 4" steel channel frame
- 500 lb. capacity fenders with anti-skid treatment
- 6,000 lb. GVWR trailer
- Variable electronic throttle
- Murphy safety gauges with auto-shutdown
- Electric brakes
- 2" PVC fill pipe assembly
- One (1) 12 volt power supply outlet

3510-FC & 3510-E

Standard Components

3510-FC

- 10 GPM @ 2500 psi water pump
- 20 hp gasoline engine
- Electric hose reel
- 400' x 1/2" hose capacity
- 350 gallon capacity polyethylene water tank
- 3" steel channel frame
- 500 lb. capacity fenders with anti-skid treatment
- 6,000 lb. GVWR trailer
- Electric brakes
- 2" PVC fill pipe assembly

3510-E

- 10 GPM @ 2500 psi water pump
- 20 hp gasoline engine
- Electric hose reel
- 300' x 3/8" hose capacity
- 350 gallon capacity polyethylene water tank
- 3" steel channel frame
- 500 lb. capacity fenders with anti-skid treatment
- 6,000 lb. GVWR trailer
- Electric brakes
- 2" PVC fill pipe assembly

JVLT - Combination Jet and Vacuum Machine

The Best of Both.

The compact O'Brien JVLT is designed specifically for smaller sewer and pipe applications that require both high pressure water jet cleaning and high powered vacuuming. This compact, easy-to-operate machine is capable of jetting and vacuuming at the same time, all operated from a single machine.

Standard Components

- 18 GPM @ 3500 psi water pump
- 800 CFM positive displacement blower (16" Hg)
- 95 hp water-cooled diesel engine
- 500 gallon debris tank capacity
- 325 gallon SS water tanks
- 180° hose reel articulation
- 600' x 1/2" hose capacity
- 360° hydraulic boom rotation with pendant remote
- 4" boom intake hose
- Hydraulic power debris door locks
- Centrifugal strainer with perforated stainless steel insert
- Low water level shutdown
- Water pump & positive displacement blower capable of being operated independently or simultaneously
- 45° dump angle
- 6" gate valve drain on rear door
- 12,000 lb. GVWR trailer
- Aluminum diamond plate toolbox mounted
- Four (4) 6' x 4" aluminum extension tubes
- One (1) 6' x 4" aluminum intake tube

Cart and Toolbox Jetters

2500 Series - Cart Jetters

O'Brien 2500 Series Cart Jetters are user-friendly models preferred for residential and commercial sewer lines up to 6" in diameter. The optional lateral cleaning kit package allows the unit to be left outside a building while an inside line is being cleaned. O'Brien Cart Jetters feature an automatic throttle control valve, which allows the engine to respond to water usage. Open the flow and the engine will rev up to maintain maximum pressure or cut the flow and the unit idles down for reduced noise, pump wear, and engine wear. Capable of going anywhere, the O'Brien 2500 Series provides power to go.

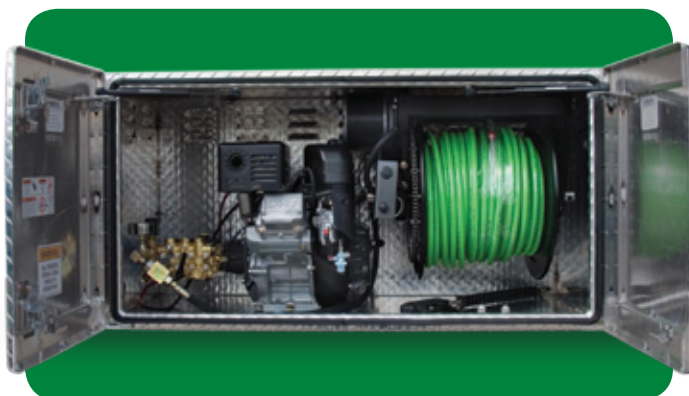

Standard Components

- 4.0 or 4.8 GPM @ 3000 psi water pump
- 11 or 13 hp gasoline engine
- Manual or electric start engine
- 300' x 3/8" hose capacity
- Garden hose inlet
- Throttle control valve
- Nozzle storage rack
- Durable powder coated cart frame

1100 Series - Toolbox Jetters

Mountable anywhere, the convenient O'Brien 1100 Series packs the punch of up to a 13 hp cart jetter. Toolbox jetters are ideal for cleaning suction hose, cleaning laterals back to a house, and are the most efficient way to wash your truck at the end of the day. Turn your pumper into a jetter with an O'Brien 1100 Series space-saving unit.

Standard Components

- 4.0 or 4.8 GPM @ 3000 psi water pump
- 11 or 13 hp gasoline engine
- Manual or electric start engine
- Electric rewind hose reel
- 300' x 3/8" hose capacity
- Garden hose inlet
- Throttle control valve
- Nozzle storage rack
- 48" x 24" x 24" lockable aluminum diamond plate toolbox
- Wash-down gun

Once a Hydro-Jetter user, Always a Hydro-Jetter user.

*In 1966, Joe Sr.
started a sewer
cleaning business
with his first
Hydro-Jetter.*

*In 1988, Joe Jr.
joined the family
business that
owned a fleet of
of Hydro-Jetters.*

*Today, Joe Jr.'s Son
will be trained on
the company's
newest generation
of Hydro-Jetters.*

At Hi-Vac Corporation, focusing on the environment and sustainability are not simply words or slogans but are the foundation of our livelihood and business. For over 40 years Hi-Vac has provided products and systems that tackle some of the toughest infrastructure, maintenance and clean-up challenges in the world. From the largest metropolitan city to the most critical power plant, Hi-Vac products are at work behind the scenes maintaining the infrastructure, improving air quality, non-destructively excavating, recycling, cleaning and maintaining the environment.

Hi-Vac Corporation products are sold under leading brand names in a wide range of critical markets.

Our O'Brien brand products are the preferred jetter technology for municipalities and specialty contractors who utilize dedicated jetting technology. Our Aquatech brand products provide the best combination vacuum jetter technology for municipalities worldwide. Aquatech trucks deliver unsurpassed performance for use in the cleaning of underground piping, catch basins, storm sewers, lift stations, and treatment plants.

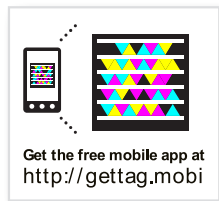

The UltraVac and X-Vac products are known throughout the specialty contractor community as the most powerful and reliable contractor trucks available. UltraVac products include a full range of vacuum loaders, trucks, and mobile systems for efficient industrial clean-up and transport. X-Vac Hydro-Excavators set the industry standard offering a safe and efficient method for locating underground utilities, exposing broken water lines, cleaning out potholes, and vacuuming a wide range of materials.

Last but not least, the Hi-Vac product brand (the first product line under the Hi-Vac Corporation umbrella) is the market leader in industrial vacuum technology used by facilities worldwide. You'll find Hi-Vac equipment in power plants, chemical plants, glass manufacturing plants, cement facilities, foundries and various manufacturing facilities where safety, efficiency, recycling, environmental compliance, and effective material management are critical.

O'BRIEN®

A Product of Hi-Vac® Corporation

Leading professionals at Municipalities, Specialty Contractors and Industrial facilities prefer products from Hi-Vac Corporation because they know Hi-Vac is the trusted solution when efficiency, power, and reliability are paramount.
