

# **Crush the Competition**

The **Enviromaster DT** is Loadmaster's dual tailgate rear loader designed to fit any dual stream collection route. Proudly made in the USA with Loadmaser's long-standing reputation of reliability and robustness.

### **Inner Tailgate Remote Zerks**

Proper lubrication of body components is important. We made the inner Tailgate Remote Zerks standard so you can easily maintain your equipment. In combination with our Triple Tailgate and Sweep Base End remote Zerks and our Ejector Remote Zerk options the complete truck can be greased from the ground.

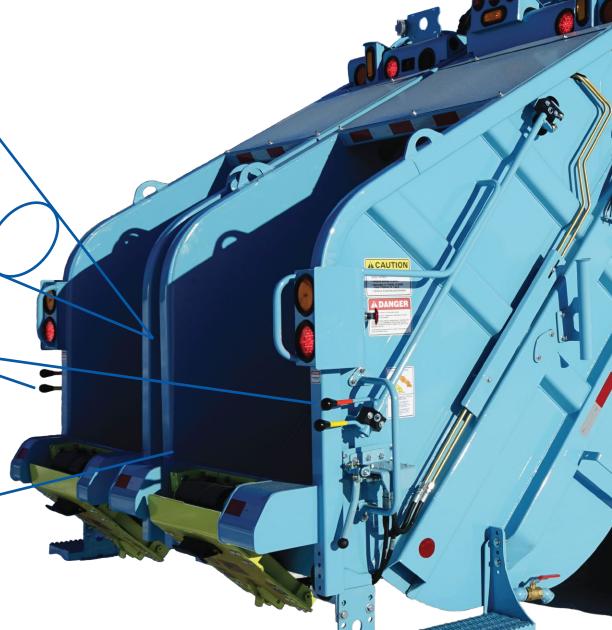

### **Independent Tailgate Controls**

Simplicity enhances reliability. We have made each tailgate its own independent system to conveniently place packing controls on the outside of each tailgate.

### **Rugged Hopper**

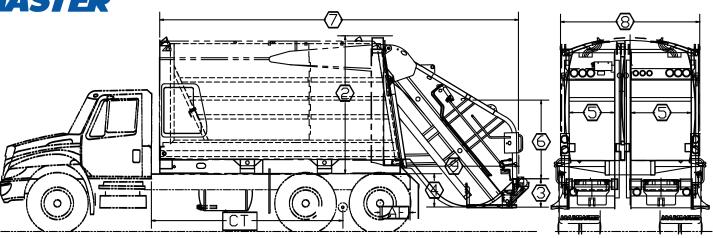

Our hopper floor is constructed of 3/16" Hardox 450 with a 1/4" AR 400 shelf liner and 3/16" Hardox 450 sides creating a hardy concoction that makes for an extremely resilient, long-lasting, machine.
